

**METHOD AND APPARATUS FOR PROVIDING
CONTEXT-SENSITIVE CODE AHEAD INPUT**

ABSTRACT OF THE DISCLOSURE

A method, article of manufacture, and apparatus for providing context sensitive code ahead input to a user of a computer system. Initially, an entry for a document is received. A context in the document is identified based on a predefined definition of the received entry. The predefined definition associates the entry with a code ahead input. The code ahead input based upon the identified context is then displayed on a display device of the computer system.
